ACADEMIC PROJECTS

• project

Title:-Clothing Website

The Website Offering offering customers a convenient platform to browse and purchase fashionable clothing items. It often includes providing a wide range of styles, sizes, and price points to cater to diverse tastes and budgets. Additionally, these websites might focus on delivering excellent customer service, easy navigation, and secure payment options to enhance the overall shopping experience. Ultimately, the aim is to create a seamless and enjoyable online shopping destination for customers. To develop this website I used to ASP.Net as front-end and back-end is sqlserver 2008.
